

Questions and Inquiry : Chemistry and measurement Lesson

1- The science of chemistry has been linked since ancient civilizations to some artistic industries, such as all of the following except...

Fabric dyeing

Metals and mining

Glass industry

Leather tanning

2- Science contributes.... Inventing new methods of measurement that increase its accuracy

Physics

Chemistry

Astronomy

Geology

3- Science concerned with understanding the chemical reactions that take place within living organisms...

Biological

Astronomy

Chemistry

Analytical chemistry

4- Extracting some medicines from natural sources is the result of integration between scientific...

Chemistry and agriculture

Chemistry and pharmacy

Medicine and pharmacy

Pharmacy and biology

5- The science of... is concerned with discovering and building materials that have superior properties that can be used in communications.

outer space

physical chemistry

Nanochemistry

Physics

6- One of the measuring instruments equipped with a valve to control the amount of liquid used...

Decanter

The listed laboratory

Burette

7-.... A glass instrument used in preparation and distillation processes

Burette

The pipette

Sensitive Libra

Round flask

8- When performing a calibration process, each of the following is used...

Erlenmeyer flask and burette

Duraq Ayari and Sahaha

Glass beaker and included tester

Burette and tester included

Inquiry

Why is chemistry considered the center of science?

What did the ancient Egyptians use chemistry for?

What are the fields of chemistry?

What are the different branches of chemistry?
