

Parents guide : Chemistry and measurement Lesson

If a parents wants to explain the lesson to his son, he must first obtain a background on what the lesson is and its content.

Therefore, he must resort to the existing resources section and look at what is inside it because it will help him understand the lesson in a simple way.

Parents can play an educational video about the content of the lesson (the video will be attached to the content in the Resources section)

They can use some of the questions posted on the site about the lesson and solve them together

They can imitate what happens in the classroom at home by resorting to the explanation icon, and they benefit from knowing how the teacher explains to the students and conveys the information to them in a simplified manner.
