

Parent guide

Real functions

In order to explain the lesson at home, you can follow the following steps

- 1 - The basics must be reviewed in terms of functions and graphs
- 2- Focus on graphs because they explain the meaning easily
- 3 - In the beginning, the axes must be defined well in the sense of the x and y axes, both of which determine the extent and field
- 4- Focus on the technology used in drawing countries on a graph
- 5- Focus on open and closed periods and when they are open and when they are closed
- 6 - Using life applications to make the student able to link the lesson to world life
- 7- Abbreviating functions so that they can be defined simply
- 8- Determine the domain of a function when it lies between intervals
- 9- Using activities to facilitate the comprehension process
- 10 - Solve the largest number of equations so that he can obtain the largest number of thoughts
